

SONNEX ENGINEERING Pty Ltd

Serving people who appreciate Quality

Sonnex Engineering is an Australian owned and operated engineering company based in Elizabeth, South Australia. Our engineering services expertise has been recognised by a number of major South Australian and overseas companies resulting in us achieving preferred supplier status.

Sonnex has a particular focus and interest in all aspects of manufacturing industry, where it has over 15 years engineering experience and this successfully utilised and leveraged across and into other industries.

The main strengths of our organisation have been recognised in the areas of:

- Project installation on time and to budget;
- Structural steelwork and fabrication for buildings;
- Design and manufacture of materials handling equipment;
- Laser cutting, bending, folding, welding.

Sonnex work philosophy emphasises a cooperative approach to all its dealings with customers, employees and suppliers and will work with customers to deliver innovative cost effective solutions

The company strives to develop long-term relationships with clients who appreciate quality engineering craftsmanship. Working relationships are characterised by common goals, open and honest communication and team work to ensure that we deliver on, or ahead of time, to your budget.

Sonnex partners with leading organisations in Australia and the world to provide additional value to its customers with our primary values for our internal and external relationships being flexibility, responsibility and integrity.

Capability and Resources

The company's in-house resources are able to service all project sizes, from small job lots right through to multi-million dollar contracts for steelwork and formwork for building contractors.

Sonnex have the capabilities to participate in both capital intensive projects and long-term maintenance contracts. Our facilities include machining, heavy engineering and sheetmetal fabrication, tooling research and development and bulk materials processing, including Laser cutting of plate 35mm in widths up to 3m x 6m.

Recent acquisitions of a Cosen 800 CNC Bandsaw, Hako 3600mm x 155 Tonne 9 axis CNC Pressbrake, and a Hako "Raptor" Laser cutting machine have further increased our capacity to provide exceptional and efficient service to our clients.

Laser Cut parts for conveyors for Sth Africa

projects

Sonnex background with major Australian and international corporations has given the company the experience across a broad range of industry sectors in a wide geographic spread. The company has accomplished key project successes, including the design, manufacture, installation and maintenance of:

- Structural steelwork and formwork
- Process plant and equipment,
- Conveyor systems for Australia and South Africa,
- Spray booths,
- Ovens and kilns,
- Industrial presses,
- Robotic systems, and
- Other specialty machinery.

Sonnex has a reputation of working with its customers to develop innovative, timely and low cost solutions to meet engineering and maintenance challenges.

Sonnex has recently completed 2 major steelwork construction jobs in SA and WA covering project management, supply and installation.

For the Mowanjum Art Centre in Derby WA this also covered the complete CAD engineering drawing set for the manufacture and construction requirements.
